Advantages

Evision 5 offers reliable and efficient verification of banknotes through dedicated sensor technology.

The elegant size-optimized design requires very little desk space.

Evision 5 is the easiest to operate euro detector on the market. Every function is handled through one single button, with a very logical operation.

When new banknotes are issued, the software can be updated by using a microSD memory card or the USB connection. It has never been easier.

Warranty

12 months against all defects in material and labour.

Benefits

Evision 5 offers safety and security to shops and employees by giving a reliable, subjective decision in the verification of banknotes.

Evision 5 saves time and money by requiring practically no training of the user and by the simple and fast operation. Payments are not delayed.

No need to question the genuineness of banknotes; Evision 5 will give you the answer.

Fast, small, quiet, efficient, beautiful and simple. Evision 5 is the clever solution.

Approvements

RoHS compliant and CE marked.

Software can be updated by inserting a standard microSD memory card in the rear side slot.

Evision 5 can be equipped with a rechargeable battery (optional).

The top part is easy to open when cleaning.
